

F6 · The quadrature mesh in next-state (X' , Y') space (marker area $\propto$ weight; example $X_t = 0.1$, $Y_t = 0.5$)

FAST ($M_x = 2$, $N_{max} = 1$, $M_{perk} = 1$) $\rightarrow$ **M=4**

ACCURATE ($M_x = 4$, $N_{max} = 2$, $M_{perk} = 4$) $\rightarrow$ **M=36**
