

# F6 · The quadrature mesh in next-state ( $X'$ , $Y'$ ) space (marker area $\propto$ weight; example $X_t = 0.1$ , $Y_t = 0.5$ )

**FAST** ( $M_x = 2, N_{max} = 1, M_{perk} = 1$ )  $\rightarrow$  **M=4**

**ACCURATE** ( $M_x = 4, N_{max} = 2, M_{perk} = 4$ )  $\rightarrow$  **M=36**
